

Selective Light Control

Control the ambiance in your bathroom

PHANTOM MIRRORS 2024-2025

Step into the world of innovative mirrors

PHANTOM, the brand that raises the bar for bathroom mirrors. Discover the revolutionary light-through-mirror concept, where illumination shines through the mirror without leaving a trace of the light source when turned off. It's not just a mirror; it's an experience that transforms your bathroom into an oasis of sophistication and modernity.

Lighting is no longer limited to a simple on or off switch. With 'Selective Light Control', Phantom Mirrors gives you control over the ambiance in your bathroom. Choose direct lighting for a focused and practical view of your face, let indirect light fill the space for a warm, ambient glow, or combine both for an enhanced lighting experience. Your bathroom, your style, effortlessly customized.

Innovation doesn't stop at LED lighting. Phantom Mirrors understands the daily challenges of bathroom life and offers solutions that exceed expectations. Say goodbye to foggy mirrors with integrated mirror heating and welcome crystal-clear visibility. The intuitive dual-touch switch makes operating your mirror as effortless as the elegance it exudes. Phantom Mirrors doesn't just illuminate design; it enhances usability.

The Phantom Mirrors experience. Brighten your day, illuminate your space, and enjoy the ultimate comfort of a mirror that not only reflects but also innovates. Upgrade your bathroom to a new dimension of style and functionality with Phantom Mirrors – where lighting becomes an art form, and every glance in the mirror is a moment of pure luxury.
